

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 (Previously Presented) A method for allowing a user to select actions to be taken by a server when uploading images from a digital camera over a network, the method comprising:

 downloading an action list from the server to the digital camera after the digital camera establishes a connection with the server, the action list including one or more items representing actions that the server should take with respect to uploaded images;

 displaying the action list to the user on the digital camera after the user initiates an image upload process;

 after the user selects at least one of the items in the action list, sending the images and the selected action list item from the digital camera to the server;

 and

 performing the action on the uploaded images specified by the selected action item.

2 (Previously Presented) The method of claim 1 further including providing the server as part of a photo-sharing service website.

3 (Previously Presented) The method of claim 2 further including providing the action list with at least one of a print item, a store item that instructs the server where to store the images, and a send item that instructs the server where to send the images.

4 (Previously Presented) The method of claim 3 further including providing that the store item instructs the server to store the images within the photo-sharing service website.

5 (Previously Presented) The method of claim 3 further including providing that the store item instructs the server to store the images to a location external to the photo-sharing website.

6 (Previously Presented) The method of claim 3 further including providing an e-mail address as the send item in the action list.

7 (Previously Presented) The method of claim 2 further including allowing the user to create the action list on the digital camera.

8 (Canceled).

9 (Previously Presented) The method of claim 1 further including creating a user account for the user the first time the digital camera establishes a connection with the server, and creating a default action list for the user.

10 (Previously Presented) The method of claim 1 further including allowing the user to manually create the action list on a photo-sharing service website by navigating to the photo-sharing service website using a web browser and manually creating the action list.

11 (Previously Presented) The method of claim 1 further including automatically creating the action list on a photo-sharing service website in response to the user actions performed on the photo-sharing service website through a web browser.

12 (Previously Presented) A system for allowing a user to select actions to be taken by a server when uploading images from a digital camera over a network, the system comprising:

means for downloading an action list from the server to the digital camera after the digital camera establishes a connection with the server, the action list including one or more items representing actions that the server should take with respect to uploaded images;

means for displaying the action list to the user on the digital camera after the user initiates an image upload process;

means for sending the images and the selected action list item from the digital camera to the server after the user selects at least one of the items in the action list;
and

means for performing the action on the uploaded images specified by the selected action item.

13 (Original) The system of claim 12 wherein the server comprises part of a photo-sharing service website.

14 (Previously Presented) The system of claim 13 wherein the action list includes at least one of a print item, a store item that instructs the server where to store the images, and a send item that instructs the server where to send the images.

15 (Original) The system of claim 14 wherein the store item instructs the server to store the images within the photo-sharing service website.

16 (Original) The system of claim 14 wherein the store item instructs the server to store the images to a location external to the photo-sharing website.

17 (Original) The system of claim 14 wherein the send item in the action list comprises an e-mail address.

18 (Previously Presented) The system of claim 13 wherein the user creates the action list on the digital camera.

19 (Canceled).

20 (Previously Presented) The system of claim 12 wherein a user account and a default action list is created for the user the first time the digital camera establishes a connection with the server.

21 (Currently Amended) The system of claim 12 wherein the user can ~~to~~ manually create ~~creates~~ the action list on a photo-sharing service website by navigating to the photo-sharing service website using a web browser and manually creating the action list.

22 (Previously Presented) The system of claim 12 wherein the action list is automatically created on a photo-sharing service website in response to the user actions performed on the photo-sharing service website through a web browser.
